

The Do Not Call List is an essential device to protect consumers. The Do Not Call List should not be weakened in New Jersey. The Do Not Call List gives consumers (especially senior citizens and disabled New Jerseyans) the ability to fight back against unwanted solicitation in their homes. The Do Not Call List is an opt-in device and people that wish to have telemarketers call them have the ability to not block their calls. However, those that do not want intrusion into their homes have the ability to keep them from calling. Please do not take this vital consumer tool away or weaken it in New Jersey.
